The Union Budget 2022-23 reserved 25% of the defence R&D budget for private industry and start-ups, fostering new defence technologies. By April 2023, 606 industrial licenses were issued to 369 companies, with defence exports rising 240% over five years to \$1.9 billion in FY23. Our business verticals are managed through our wholly owned subsidiaries, associates, and joint venture. This strategic approach allows us to optimize control, risk management, and access to markets while adhering to legal and regulatory requirements. Until December 31, 2023, JKE was holding 99% stake in Silvergrey.

*** With effect from January 31, 2024, the entire business of Silvergrey Engineers, a Partnership Firm, has been merged into the Company by way of acquisition of 100% stake. JKE's Consolidated Revenue as on March 31, 2024 is inclusive of revenue (Rs.60.46 Lakh) generated from Defence Division of JKE (i.e., Silvergrey Engineers- now merged with JKE) for the period of February 01, 2024 to March 31, 2024.*

Although we may not have complete direct control over the day-to-day operations of some of our group entities, our management team have requisite knowledge and talent to effectively oversee and allocate time and attention to each organization. This enables us to supervise their operations and assess their potential for development. In addition, we assess certain important issues at a collective level, while these organizations have independent resources to assist with their daily activities and decision-making. Furthermore, it is essential that we consistently enhance our cost controls, internal controls, and accounting and reporting systems to effectively support our varied business ventures. To effectively manage our diverse businesses, we must stay updated on important developments in each industry and location from where we operate. Additionally, we need to enhance our operational, financial, and management systems, improve the skills of our senior staff, and provide ongoing training, motivation, and supervision to our employees. Furthermore, these varied enterprises may encounter unique geographical, regional, macroeconomic, and financial obstacles that differ from the ones we are accustomed to. Any negative changes in their business operations or failure to meet their obligations could have a detrimental effect on our financial situation. For instance, our Wholly Owned Subsidiaries, namely JK Digital & Advance Systems Private Limited and JK Defence And Aerospace Limited are both newly incorporated and as on date of the Letter of Offer are not

carrying any business as such and we cannot assure whether they would be in a position to effectively carry on the intended business on their own. For the risks pertaining to the losses by our Associate, Nebula 3D Services Private Limited, please see Risk Factor - *Any accumulated losses of our Associate Company(s) may have a negative impact on the consolidated net-worth of the Company.*” on page 36 of the Letter of Offer.

The Company has encountered financial setbacks in the past, and the prospect of continued losses in the future remains a possibility attributable to various factors, including market conditions, operational challenges, industry dynamics, investment and expansion risks, cost management, and global economic factors. Investors should exercise due diligence and carefully evaluate these factors before making investment decisions. Although the Company remains committed to addressing challenges through strategic initiatives, there is no assurance of unequivocal success in overcoming them. While the Company reported a profit after tax of Rs. 1,292.64 Lakh (Standalone) and Rs. 859.46 Lakh (Consolidated) in FY 2024 (as set out in Table 2 above), investors are urged to exercise prudence and recognize that prior financial success is not indicative of guaranteed future profitability. Our industry's dynamic nature, coupled with external influences, underscores the inherent uncertainties inherent in our financial performance. For further details on our profitability, see our Company's *Consolidated Profit and Loss Statement* on page no. F 21 in the chapter titled “**Financial Information**” of the Letter of Offer.

Due to our limited experience in all of the above businesses, we may face unanticipated hurdles with respect to such new business. Further, some of these initiatives may fail to commence or may have to be abruptly discontinued at their early stages, due to regulatory, commercial or other reasons. We may also fail to initiate or choose to discontinue the new initiatives if we do not attract significant business from such initiatives. Additionally, the anticipated benefit of many of our recent initiatives may not materialize if we fail to integrate our initiatives or newly acquired business with our business, financial condition, cash flows, in which case results of operations may be adversely affected.

2. Any accumulated losses of our Associate Company(s) may have a negative impact on the consolidated net-worth of the Company.

Our Associate Company, Nebula3D Services Private Limited wherein we hold 27.65%, has reported losses in recent financial years majorly due to severe impact on its operations during Covid. The past losses of the Associate have resulted in the erosion of its net worth as well as impacting our Company's Net worth also. Details of losses in Nebula3D, and its impact on our net worth is given below:

(Rs, in lakhs)

Particulars	Opening balance of reserves (Accumulated losses)	Loss after tax during the financial year	Impact on Networth of Nebula	Impact on Consolidated networth of JKE (to the extent of stake held i.e., 27.65%)	JKE Net worth post adjustment of accumulated losses from Nebula*

	(A)	(B)	(C)	(D = B*27.65%)	(E)
FY 2023-24	(349.96)	(106.66)	(456.62)	(29.49)	19,581.45
FY 2022-2023	(261.14)	(88.82)	(349.96)	(24.56)	15,032.39
FY 2021-2022	(197.32)	(63.82)	(261.14)	(17.65)	12,003.6
FY 2020-2021	(59.89)	(137.43)	(197.32)	(38.00)	9,890.58

As can be inferred from the above table that in the financial years ended on March 31, 2021, 2022, 2023 and 2024, losses of Rs. 38 Lakh, Rs. 17.65 Lakh, Rs. 24.56 Lakh and Rs 29.49 Lakh, respectively, have been consolidated with reserves of our Company, causing a reduction of the Net worth of the Company by said net losses.

We cannot guarantee a positive future outlook or certainty regarding future profitability and the reduction of accumulated losses, which may currently impact our net worth adversely. If the Associate Company continues to incur losses in future as well, it will continue to have a negative impact our Company's net worth.

3. ***As on date, our Subsidiaries have not obtained some of the approvals, clearances and permissions as may be required from the relevant authorities for the proposed facilities to be established in the manufacturing units. In the event our Subsidiary is unable to obtain such approvals and permits, our business, results of operations, cash flows and financial condition could be adversely affected.***

We have recently ventured into the business of Defence & Aerospace and other allied services and Digital Manufacturing & Advanced systems inter-alia Additive manufacturing, 3D printing, developing software products, and related technical consultancy services. Further, our newly incorporated wholly owned subsidiaries i.e. JK Defence & Aerospace Limited and JK Digital & Advance Systems Private Limited have not obtained all business-related approvals and are under process of applying for the requisite licenses and approvals, as may be required by it for doing its operations. Certain of the licenses and approvals will be applied upon possession of factory land etc.

There can be no assurance that we will be able to obtain and maintain such approvals, licenses, registrations and permits. An inability to obtain or maintain such registrations and licenses in a timely manner, or at all, and comply with the prescribed conditions in connection therewith may adversely affect our ability to carry

on our business and operations, and consequently our results of operations and financial condition. Any failure by our Company to renew, maintain or obtain such material permits or approvals or comply with conditions thereof may lead to imposition of penalties, or result in the interruption of our operations, suspension and revocation of permits and licenses, which may and may have a material adverse effect on our business and operations, financial condition and results of operations.

We may also be unable to fulfil the terms and conditions, subject to which such license and registration is granted. In the event we are not able to obtain such licenses and registrations, in a timely manner or at all, our business and growth strategy may be adversely impacted. There is no assurance that such license and registration will be granted to us in a timely manner or at all. The cost of procuring such licenses or the renewal of expiring licenses may be substantially higher than that estimated by us. Failure by us to comply with the terms and conditions to which such licenses, approvals, permits or registrations are subject, and/or to renew, maintain or obtain the required licenses, approvals, permits or registrations may result in the interruption of our operations. We may be required to temporarily halt our operations, and face disruption to our business in the event we are unable to comply with the terms and conditions subject to which we are granted licenses, or if a regulator alleges that we have not complied with such terms and conditions.

For further details of Licenses and approvals please see chapter title “Government and other Statutory Approvals”, starting on Page No. 192 of this Letter of Offer.

4. ***With respect to our defence and aerospace vertical, our business largely depends and will continue to depend on contracts from the Government of India and associated entities including defence public sector undertakings and any adverse development in defence sector may adversely affect our business and operations.***

The level of defence and aerospace spending and changes in the tax policies by the Government of India in the future is difficult to predict and may be impacted by numerous factors such as the evolving nature of the national security concerns, foreign policy, domestic political environment and macroeconomic conditions. Approximately more than 90% of our consolidated revenue is concentrated towards top 10 customers, including Government Sector Customers for our Defence industry related operation. A decline or reprioritization of the Indian defence budget, reduction in orders, termination of existing contracts, delay of existing or anticipated contracts or programs or any adverse change in the GoI’s defence related policies will have a material adverse impact on our business. As few of our group entities indigenously develops and supplies critical components to key defence projects in the country, and our recently set up Wholly Owned Subsidiary JK Defence & Aerospace Limited is in process of obtaining requisite approvals, there can be no assurance that we will be awarded with defence contracts. There is no assurance that GoI Entities will engage us. Further, any adverse change in the GoI policy may lead to cancellation or slowdown of our orders and could have a material adverse effect on our business, results of operations and financial conditions.

5. ***Our Company intends to deploy proceeds of this Issue into these subsidiaries having Nil/Negligible revenue during the disclosed financial period. JK Defence & Aerospace Limited and JK Digital & Advance Systems Private Limited, have no business and source of revenue, as on date of this Letter of Offer and there is risk of non-performance of both these subsidiaries.***

The primary Object of the issue is to make investments in its wholly owned subsidiary JK Defence & Aerospace Limited and JK Digital & Advance Systems Private Limited to the tune of approximately ₹13,800 Lakh. Both these subsidiaries are newly incorporated companies and are in the process of setting up businesses. There may be a situation where JK Defence & Aerospace Limited and JK Digital & Advance Systems Private Limited, may not operate efficiently and investments made by the Company into these entities may end up into decreasing in value, causing loss to the Company on consolidated basis. For details of present financial position of JK Defence & Aerospace Limited and JK Digital & Advance Systems Private Limited please see page 86 in Chapter Titled “Objects of the Issue”.

Both these subsidiaries are newly incorporated companies on July 03, 2023, and July 27, 2023, respectively. They are still to generate any business and sources of revenue. There is no record of past performance by these entities into their areas of operations. For details of area of operations of these entities please see chapter title “Our Business” on page no. 128. The Non-availability of any past performance records makes us unable to estimate the future prospects of these companies individually. All the investments plans by us in these entities are an estimation by the management of the Company, considering the growth prospects of Defence & Aerospace and Digital & Advance System industry. For details of Industry of operation of these entities please see chapter title “Industry Overview” on page no.110.

6. ***JK Defence & Aerospace Limited has been allotted 5 acres of Land at Karnataka Industrial Area Development Board (KIADB), General Industrial Area ITIR, Devanahalli Taluk, Bangalore Rural District, Karnataka for establishment of manufacturing unit to perform its business activities and to give space for rent to JK Digital for establishment of its Centre of Excellence (CoE), for which JK Defence have made the initial deposit payment by taking loan of ₹ 545 lakhs from the Company, JK Defence may be unable to pay the remaining amount, which may result in non-allotment of Land and thus adversely affect our proposed business plan for JK Defence & JK Digital.***

JK Defence, for carrying out its business operations, proposes to establish a manufacturing unit for manufacturing of Precision Turned Components and all types of Engineering Goods for the Defence, Aerospace and other allied industries for which it had applied for land allotment at KIADB, General Industrial Area ITIR, Bangalore. The said land measures 5 acres and is situated at KIADB, General Industrial Area ITIR, Devanahalli Taluk, Bangalore Rural District, Karnataka. An initial deposit of 30% of ₹550.75 lakhs has already been paid for said land on March 28, 2024.

The total cost of the land is estimated to be Rs. 1,954.28 Lakh to the Company (including the cost of the 5 Acre land at the rate of Rs. 367 Lakh/ acre, Stamp Duty @5.5% and Registration Fees @1% of Market Value). KIADB vide letter dated March 14, 2024, instructed for an initial deposit of Rs. 550.75 Lakh (30% of Cost of 5 Acre land at the rate of Rs. 367 Lakh per acre including Rs. 0.25 Lakh for Earnest Money Deposit), within 30 days thereof, which has been paid on March 28, 2024 for acquisition of land on a 99 years lease. It may be noted that JK Defence is yet to pay the remaining 70% of the cost, amounting to Rs. 1,403.53 Lakh, which is proposed to be funded from the funds to be infused in JK Defence by JKE from the proceeds raised through this Issue.

Schedule of the payment for the land is as under:

#	Events Breakup	Working Days	Amount in Lakh	Due Date
1	Along with the application Initial Deposit to be submitted (30% of the Land Cost)	30 days from the date of communication	550.75	30-03-2024 (Paid on March 28, 2024)
2	70% of land value to be paid.	90 days from the date of allotment letter.	1,403.53*	29-08-2024

*Including Stamp Duty.

JK Defence may be unable to pay the remaining amount to the KIADB for allotment of land, which will ultimately result in no claim on allotment of land and/ or of the initial deposit amount and may also result in cancellation of JK Defence application for allotment of land. This situation may add to the financial burden on JK Defence and thus can hamper the entire business plans.

7. ***Over the years, there have been many changes in the Company's business activities and we have recently entered into new business and we may not be able to perform as anticipated or commence on time or at all or may be discontinued.***

Entry into new businesses and markets subjects us to various challenges, including those relating to our lack of familiarity with the intricacies of the operations, trends in customer preferences, relative strengths of competitors' products, difficulties in staffing and managing such operations, the lack of brand recognition and reputation in the segment, among other. Additionally, by entering into new business, we could be subject to additional risks associated with establishing and conducting operations, including compliance with a wide range of laws, regulations and practices; exposure to expropriation or other government actions; and political, economic and social instability. We may not be able to execute our plans in a timely and cost-efficient manner. Further, our investment in these new businesses or segments may not be successful if they do not perform as per our expectations.

We started our journey in year 1943 under the name and style of 'J.K. Investment Trust Limited' registered under the provisions of the Indian Companies Act 1913, to function as an investment company. In 1960, we transitioned from our business of an investment company, and entered into the business of manufacturing nylon and acrylic fibers. In order to reflect the business of the Company, our name was changed to 'J.K. Synthetics Limited'.

Later in the year December 1994, our Company had obtained a certificate of registration as Registrar and Share Transfer Agent in its erstwhile name "J.K. Synthetics Limited", bearing SEBI Registration Number INR100000014 having validity from January 1, 1995 till December 31, 1997 and renewed thereafter till the year 2000 under Registration Number INR100000576 and renewed further with SEBI Registration Number INR100000592 from the year 2001 onwards.

In the year 1998, our Company was referred to Board for Industrial and Financial Reconstruction (“**BIFR**”) and thereafter to Appellate Authority for Industrial & Financial Reconstruction (“**AAIFR**”) whereby pursuant to a scheme of rehabilitation as sanctioned AAIFR, various revival steps were undertaken including slump sale of Cement division of our Company and thereafter our Company came out from the purview of BIFR.

Later in the year 2010, the name of our Company was changed to ‘Jaykay Enterprises Limited’. However, in year 2021, the management of the Company made the decision to cease its Registrar and Share Transfer Agent business permanently and later applied to SEBI, for surrender of the certificate of registration, for which the approval has been received from SEBI vide its letter no. SEBI/HO/MIRSD/MIRSDRACDoR2/P/OW/2024/4260/1 dated January 30, 2024.

In year 2022, we have again amended our objects in order to enable us to undertake a new line of business inter alia, Defence & Aerospace Sector and IT enabled services. Further, we have recently, through our Wholly Owned Subsidiaries, Subsidiaries and Associates and partnership firm, entered into business of Defence & Aerospace and other allied services and Digital Manufacturing & Advanced systems inter-alia Additive manufacturing, 3D printing, developing software products, and related technical consultancy services. Entering into new initiatives requires strategic planning and efficient use of resources.

Our past history of unsuccessful businesses may impact our future businesses as well. And we cannot assure as to the success of our new ventures/ business projects and the time within which profitability may arise, cannot be anticipated.

8. Risk of Significant Dependence on Trade Receivables Due to Sales Structure.

Our business model is such that a significant portion of our sales remains as trade receivables. A comparative table, for the Financial Years March 31, 2023 and March 31, 2024, depicting our Company's total consolidated revenue and consolidated Trade Receivable is as under:

Financial Year ended	Total Consolidated Revenue	Consolidated Trade Receivable
March 31, 2023	Rs. 5,865.82 Lakhs	Rs. 5,315.06 Lakhs
March 31, 2024	Rs. 6,663.67 Lakhs	Rs. 4,961.55 Lakhs

From the above, it can be observed that a significant portion of our sales during these periods were under trade receivables, making our revenue realization highly dependent on the timely collection of these receivables. This reliance poses an inherent risk that could materially and adversely affect our financial condition and operational performance. There is a substantial credit risk associated with trade receivables. Any delay or default in payment by our customers could significantly impact our cash flow and liquidity. Prolonged delays in collection or occurrence of bad debts could adversely affect our financial condition, results of operations, and future prospects. Additionally, a considerable concentration of trade receivables with a few key customers could disproportionately affect our overall financial health if any of these customers experience financial instability or delays in payment.

Economic and market conditions also play a critical role in our ability to collect receivables on time. Adverse economic conditions, changes in market dynamics, or sector-specific downturns could impact our customers' ability to pay their dues promptly, increasing the risk of overdue receivables and bad debts. Our credit policies and the terms extended to customers are crucial in managing these risks. Any relaxation in credit terms or inadequate assessment of customer creditworthiness could exacerbate our exposure to payment delays and defaults. Given the significant proportion of our revenue derived from trade receivables, potential investors should carefully consider these risks when evaluating our company's financial health and future prospects in the context of the rights issue. The management remains committed to closely monitoring and managing credit risk, but there can be no assurance that these measures will fully mitigate the risks associated with trade receivables.

9. *Risk of Financial Reporting and Integration Due to Subsidiary Consolidation of M/S Silver Grey Engineers*

Effective April 21, 2022, M/S Silver Grey Engineers, a partnership firm, became a subsidiary of JayKay Enterprises Limited. Consequently, line-by-line consolidation of Silver Grey Engineers has been performed proportionately from April 21, 2022, to the reporting date of March 31, 2023. The consolidation values have been sourced from the audited financial statements of M/S Silver Grey Engineers, which were prepared in accordance with the Accounting Standards issued by the Institute of Chartered Accountants of India (ICAI).

While the auditor has mentioned that there would be no significant impact on profit or loss if the financial statements were prepared in accordance with the Indian Accounting Standards (IndAS) issued by ICAI, there remain potential risks associated with this consolidation. These risks include the integration of financial systems and processes, potential discrepancies in accounting practices, and the accuracy of the audited financial data used for consolidation. Any inconsistencies or errors in these processes could impact the financial reporting and overall financial condition of the Company.

Potential investors should carefully consider these risks when evaluating the company's financial health and future prospects in the context of the rights issue. The management is committed to ensuring accurate and compliant financial reporting; however, there can be no assurance that all risks associated with the consolidation process will be fully mitigated.

10. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. Our Company, on consolidated basis as of March 31, 2024, had following outstanding dues along with details of ageing days:

Period	Total amount outstanding (Rs in lakhs)
Amount due for 0-30 Days	2,305.47
Amount due for 31-60 Days	239.27
Amount due for 61-90 Days	498.20
Amount due for 91-120 Days	23.14
Amount due for 120-180 Days	140.37
Amount due for 181-365 Days	215.03
Amount due for 1-2 Years	1,128.87
Amount due more than 2 Years	411.20
Total Debtors	4,961.55

Above details have been certified by M/s P.L. Tandon, Chartered Account, Statutory Auditor of the Company vide certificate dated July 30, 2024.

As on March 31, 2024, an aggregate amount of Rs. 1,918.61 Lakh is outstanding for more than 90 days. These are majorly contributed due to the credit sales of additive 3 D Printing machines by our subsidiary Neumesh Labs Private Limited, which being of latest technology for additive manufacturing of critical parts, are expensive as compared to traditional alternative technology available. Thus, to promote the sales we offer longer credit facilities. This prolonged receivable period can strain liquidity, affecting the Company's ability to meet short-term obligations. To address this, our Company has implemented steps such as tightening credit policies, enhancing collection efforts, to recover these receivables and improve overall financial stability.

If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it may have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

11. There are certain outstanding legal proceedings involving our Company and our Subsidiaries. Any adverse outcome in such legal proceedings may adversely affect our business, financial condition and results of operations.

Further, our Step-down Subsidiary, Allen Reinforced Plastics Private Limited (“ARPL”), is involved in a criminal proceeding initiated by the CBI against ARPL’s erstwhile promoters and directors and others. Such legal proceedings could divert management time and attention and consume financial resources in their defence. A significant degree of judgment is required to assess our exposure in these proceedings and determine the appropriate level of provisions, if any. There can be no assurance on the outcome of such legal proceedings, notices, and summons or that such matters will be adjudicated in our favour or that the provisions we make will be adequate to cover all losses we may incur in such proceedings, or that our actual liability will be as reflected in any provision that we have made in connection with any such legal proceedings. If a significant number of these legal proceedings are finally determined against us, our reputation, business, cash flows, financial condition and results of operations could be materially and adversely affected.

12. If we are unable to raise additional capital for our business, it may delay our Company’s growth plans and have a material adverse effect on our business and financial condition.

We will continue to incur significant expenditure in maintaining and growing our business operations. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. Our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, if we are unable to arrange adequate financing on timely basis, it could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and regulatory framework that allows us to raise capital. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. Further, too much dependence on the debt would have a negative impact on the financials as the Debt to Equity ratio (which was 0.53 for Financial year ended on March 31, 2024, on consolidated basis) may go higher than the Industry standards, impacting financial position of the Company as well as the market price of our shares. If we are unable to

raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

13. We had negative cash flow from operating and investing activities, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

Our Company had negative cash flows from our operating and investing activities in the previous years including for Financial Year 2024. Summary of our Cash Flows from Operating activities, Investing Activities and Financing Activities for financial years ended on March 31, 2024, 2023 and 2022 on standalone and Consolidated basis is as following:

(Rs in Lakhs)

Cash Flow From – Standalone	FY ended on March 31, 2024	FY ended on March 31, 2023	FY ended on March 31, 2022
Operating activities	(895.43)	(794.54)	(335.18)
Investing Activities	(2,243.82)	(695.24)	(2,006.09)
Financing Activities (Note)	3,277.57	1,337.59	306.57

(Rs in Lakhs)

Cash Flow From – Consolidated	FY ended on March 31, 2024	FY ended on March 31, 2023	FY ended on March 31, 2022
Operating activities	(3,278.33)	(2,455.99)	(152.76)
Investing Activities	(2,592.54)	(275.52)	(2,231.82)
Financing Activities	6,167.57	3185.29	875.27

The negative cash flow from operating activities for the fiscal years ending on March 31, 2024, 2023, and 2022 can be attributed to several factors.

- **High Accounts Receivable:** The increase in accounts receivables is primarily due to the introduction of our latest technology, which is yet to be fully adopted by the market. As our clients are still in the process of integrating and fully utilizing this innovative solution, they have experienced temporary impacts on their cash flow cycles, leading to requests for extended payment terms. This scenario has resulted in longer payment terms and subsequently, an increase in our accounts receivables.
- **Inventory Build-Up:** The significant increase in our company's inventory is primarily attributed to the acquisition of our major subsidiary in July 2023. This subsidiary holds substantial inventory, and as a result, our overall inventory levels have surged considerably.
- **Increased Payables and Accruals:** The net liabilities including payables have increased primarily due to acquisition of our major subsidiary in July 2023 and merger of M/s Silvergrey in January 2024.

Our Company has generated cash in-flow from the financing activities in each of the financial year ended 2024, 2023 and 2022 from the following sources:

Financial Year	Date	Mode	Cash Inflow (Rs. In Lakhs)	Remarks

The Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and to make new investments without raising finance from external resources. Any operating losses or negative cash flows could adversely affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details on Cash Flow of the Company, please see page no. F 22 of the Chapter title “**Financial Information**” in this Letter of Offer.

14. We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

For further details, please see Page F 37-F38 appearing under the section titled “Financial Information” on Page 150. However, there is no assurance that we could not have obtained better and more favourable terms than from a transaction with related parties. Additionally, our Company believes that all our related party transactions have been conducted on an arm’s length basis, but we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. Our Company may enter into such transactions in future also and we cannot assure that in such events there would be no adverse effect on results of our operations, although going forward, all related party transactions that we may enter will be subject to board or shareholder approval, as under the Companies Act, 2013 and the Listing Regulations.

Above details has been certified by M/s P.L. Tandon, Chartered Account, Statutory Auditor of the Company vide certificate dated July 30, 2024.

Further, in an adverse event, if any of these guarantees are revoked or mortgaged properties are moved against, then the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. While we have not faced any revocation of such guarantees in the past, if any of these guarantees are invoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. Further, we may not be successful in procuring alternative guarantees satisfactory to the lenders and as a result, may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition. In the event of a default by our subsidiary and partnership firm under the loan facility, the lender may enforce its rights against us, including by way of appropriation and sale of assets provided as security and invocation of corporate guarantee and we may be required to immediately repay such borrowings to the either in whole or in part, together with any related costs We cannot assure you that our subsidiary and partnership firm will not default on any of our repayment obligations or other terms of the borrowing arrangements in the future or that our respective lenders will not enforce their rights upon such default.

19. Our continued operations are critical to our business and any shutdown of manufacturing units might adversely affect our business, results of operations and financial condition. The loss of, or shutdown of, our operations at the manufacturing units of subsidiaries or associates or any disruption in the operation of the warehouses will adversely affect our business, financial condition and results of operations.

The manufacturing units of our wholly owned subsidiaries and associate companies, including godowns and warehouses are prone to local social unrest, natural disaster or breakdown of services and utilities and might have material adverse effect on the business, financial position and results of our operations. These manufacturing units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. In the past three financial years, except for the lockdown restrictions imposed by various Government Authorities on the account Covid-19 pandemic, we have not faced any such instances. However, in the event, we are forced to shut down these manufacturing units for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiraling cost of living around these units may push the manpower costs in the upward direction, which might reduce our margin and cost competitiveness. These manufacturing, processing and other business activities might be subject to unexpected interruptions, including natural or man-made disasters. These

facilities and operations might be adversely affected by, among other factors, breakdown or failure of equipment, difficulties or delays in obtaining spare parts and equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labor disputes, natural disasters, raw material shortages, fire, explosion and other unexpected industrial accidents and the need to comply with the directives of relevant government authorities.

20. *In the event our marketing initiatives do not yield intended results our business and results of operations may be adversely affected.*

Though in the past, our Company has not incurred any brand building expenses, but in future, in the Digital Services segment we intend to enhance the brand recall of our products through the use of targeted marketing and public relations initiatives. In order to maintain and enhance such recognition and reputation, we may be required to invest significant resources towards marketing and brand building exercises, specifically with respect to new products we launch.

Accordingly, we may have to incur advertising and marketing expenses to increase brand recall and capture additional demand, and in the event they do not yield their intended results, our business and results of operations might be adversely affected.

21. *This Letter of Offer contains information from the publicly available information.*

We have sourced information related to our industry from the publicly available information which we believe to be accurate and complete. Industry and government sources and publications may also base their information on estimates, forecasts, and assumptions. Accordingly, it is advisable that no investment decision should be made on the basis of such information.

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “Industry Overview” of this Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We cannot assure you that any assumptions on the basis of which information related to our industry from the publicly available information are made will not change and, accordingly, our position in the market may differ from that presented in this Letter of Offer. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company.

22. *The raw materials, consumables, and specialized equipment are key requirements for any Company and the suppliers have significant bargaining power.*

The raw materials, consumables, and specialized equipment are key requirements for any Company and the suppliers have significant bargaining power. In addition, the bargaining power is also influenced by availability, unique performance attributes, and service capabilities, to name a few factors. Further, availability of raw materials during times of disruption in the markets due to any pandemic, war, dispute, embargo, etc. which may affect the logistics and movement of goods may cause disruption in the manufacturing processes which may have a material adverse effect on our results of operations, cash flows

and financial condition. Suppliers of commodity metals, scrap, alloys, and the like, control the price and supply on a global basis. Often other sectors drive the pricing of these materials, as foundry consumption is small in comparison. Disruption in international markets due to any global pandemic, war, dispute, embargo, etc. affects the logistics and movement of goods and in turn affect the prices and supplies. Hence, the suppliers to foundries have high bargaining power overall. Since the machinery, we use is of a specialized quality, there are very few suppliers of the same. On a Consolidated basis, our group entities are dependent on suppliers who contribute on an average approximately 70% to 90% of our total purchases. In an eventuality where our suppliers are unable to deliver us the required quantity in a time-bound manner, it may have a material adverse effect on our business operations and profitability. On a consolidated basis for our Defence and Aerospace Vertical our key raw material is E-Glass (Glass fabric, CSM 300, CSM 450, WR 600, Roving's), Hollow Glass Fabric and Resin Cy 205 and for our Digital and Advance System vertical our key raw material is Titanium and Aluminium.

On a consolidated basis for our Defence and Aerospace Vertical our key equipment are 3-Axis CNC Milling Machine, 4-Axis CNC Milling Machine, 5-Axis CNC Milling Machine, Wire Cut Machine, EDM Machine and CMM Machine, and for our Digital and Advance System vertical our key equipment are Filament Winding Machine, Programmed Ovens, CNC Lathe Machines., Pre-peg plant and Auto Clave.

On a consolidated basis name of some of our key raw material suppliers are as follows as per purchases made during financial year 2023-2024:

#	Defence and Aerospace Vertical	Digital and Advance System vertical
1	Metal Extrusions	Future Technologies and Services
2	Aayudh Tools	3D Engineering Automation LLP
3	Sanjana Enterprises	Veer-O Metals Pvt Ltd
4	Varun Industrial Stores	EOS GMBH Electro Optical Systems

23. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Furthermore, we are also required to meet the increasing demand and for achieving the same, adequate stocks are required to be maintained which requires sufficient working capital. The details of our working capital requirements on consolidated basis are as under:

(Amount in Lakh)

Particulars	As at March 31, 2024	As at March 31, 2023
Current Assets	14,420.38	10,365.92

Trade Receivables	357	232
Current Liabilities		
Trade Payables	184	120
Working Capital Cycle Days	648	290

Above details have been certified by M/s P.L. Tandon, Chartered Account, Statutory Auditor of the Company vide certificate dated July 30, 2024.

In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we make provisions for bad debts, including those arising from such defaults based primarily age of the debt and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

24. *Our inability to protect or use our trademark or logo may adversely affect our business.*

We believe that our Company's logo is significant to our business and operations. The use of our logo/trademark by third parties could adversely affect our reputation, which could in turn adversely affect our financial performance and the market price of the Equity Shares. As on date of this Draft Letter of Offer, our Company has registered its logo under class 19, 42, 40, 39, 41, out of which application for registration under class 19 has been objected. Further, it has been observed that Trademark for the group companies namely Allen and Nebula3D are not registered. For further details, see "***Our Business***" on page 128. Our inability to maintain these registrations may adversely affect our competitive business position, affect our brand value and consequently have an adverse effect on our business, results of operations and financial condition.

25. *We are dependent on information technology systems in carrying out our business activities and it forms an integral part of any business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.*

We are dependent on our information technology system in connection with carrying out our business activities and running our manufacturing facilities and such systems form an integral part of our business. Any failure of our information technology systems could result in interruptions in manufacturing activities, and also the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems may be vulnerable to computer disruptive problems. These problems could lead to disruptions in our business activities. Fixing such problems may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Such breaches of our information technology systems may require us to incur further expenditure. Further, the commercial success of our business is highly dependent on the developmental and innovative breakthroughs of our design division. In the event, any breach of our systems or software leads to the leaking of our designs or any inventive design techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors. However, in the past three years, we have not faced any material interruption in Information technology systems. Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

26. *We do not own our registered office. Our registered office is owned by Our Promoter Group.*

Our Registered office situated at Kamla Tower, Kanpur-208001, Uttar Pradesh, India is not owned by us. The registered office is owned by certain members of Promoter Group and we have not entered into any Leave and License or Rent Agreement for use of such premise as our Registered Office. Further, as we have not entered into Leave and License, we cannot assure you that we will be able to enter into the above arrangement on commercially acceptable/favorable terms in the future and may be asked to vacate the premises forthwith. However, in the past, we have not been asked to vacate the registered office premises by any of the members of Promoter Group. However, if we are required to vacate the registered office, we would be required to make alternative arrangements for the new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable or favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or might have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

27. We do not plan to operate in international markets. However, if we are unable to grow our business even in the domestic markets , it may adversely affect our business prospects and the results of operations.

Our Company seeks to grow its market reach domestically (itself or through its group entities) to explore untapped markets and segments i.e., 3D printing manufacturing for various applications including defence related products; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and technological challenges in addition to the changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

28. We are dependent on third party transportation providers for delivery of raw materials to us/ our Subsidiaries from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations may adversely affect our business, financial condition and results of operation.

To ensure smooth functioning of our manufacturing operations (through our subsidiaries and associate companies), we need to maintain continuous supply and transportation of the raw materials required from the supplier to manufacturing units or warehouses and transportation of our products from these units or warehouses to the customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials and delivery of our products to the customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products is likely to have an adverse effect on supplies and deliveries to and from the customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. Although, in past three years, we have not faced any disruption in delivery by third party transportation provider any failure to maintain a continuous supply of raw materials or to deliver our products to our customers in a timely, efficient and reliable manner may adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long-term agreements with the transporters for any of the manufacturing units and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfil their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which might adversely affect our business, results of operations and financial condition.

29. *We sell our products in competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.*

We face competition in our business from international, local as well as nationwide players in our industry. The products that we manufacture are available in market from a large number of players manufacturing same or similar products. Thus, factors affecting our competitive success include, amongst other things, price, demand for our products, and availability of raw materials, brand recognition and reliability. As a result, to remain competitive in our market, we must continuously strive to reduce our procurement, transportation and distribution costs, improve our operating efficiencies and secure our materials requirements. If we fail to do so, other manufacturers and suppliers or wholesalers of similar products may be able to sell their products at prices lower than our prices, which would have an adverse effect on our market share and results of operations. Our competitors vary in size, and may have greater financial, production, marketing personnel and other resources than us and certain of our competitors have a longer history of established business and reputation in the Indian market as compared with us. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability.

30. *Our Company is involved in various litigations filed by the trade unions challenging the implementation of the rehabilitation scheme which, in case of an adverse outcome, may have adverse financial and operational impact on the Company. Further, our Company is also involved in various cases related to gratuity and provident fund.*

The Company is involved in various litigations filed by the trade unions challenging the implementation of the rehabilitation scheme. The Company is also involved in various cases instituted by certain ex-employees/ex-workers for payment of gratuity and payment of provident fund along with interest before relevant authorities. In case an adverse order is passed in any of these cases, the rehabilitation scheme may be nullified and the relief granted to the Company for original liabilities of the Company prior to the rehabilitation scheme amounting to ₹1,30,000 lakhs (₹85,300 lakhs after discounting the payment made towards one time settlement amounting to ₹44,700 lakhs) may be restored placing the Company in severe debt, the reversal of demerger of the Company's division JK Cement Limited; the transfer agreement with APCPL for the Kota complex of the Company would also be in jeopardy, complicating the handling of labor dues amounting to ₹5,000 lakhs. The reversal of tax waivers of purchase tax, sales tax, and stamp duty by the state government, as well as the exemptions from certain provisions of the Income Tax Act and the waiving of interest and penalties by the Central Government. Further, in case of adverse orders involving

the labour related disputes, the Company may have to bear the financial burden of paying significant compensation and dues as well as operational difficulties including accommodation of reinstated employees who were retrenched by the Company.

The cumulative effect of reinstating the original liabilities, losing critical financial and operational reliefs, and facing renewed legal challenges would likely impact the operation and future viability of the Company.

31. *We have significant power requirements for continuous running of the manufacturing units. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.*

All the manufacturing/production units which we operate through our subsidiaries and associates ("our manufacturing units"), have significant electricity requirements and any interruption in power supply may temporarily disrupt our operations. On consolidated basis our total power consumption cost is Rs. 67.35 Lakh for period ended on March 31, 2024, which is 8.39 % of our total production cost. Our manufacturing units get power supply from the regional concerned electricity distribution company and against which the company is regularly paying the electricity tariff with the concerned electricity distribution company. We also have necessary power supply backup. Since, we have a high-power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing unit and thereby cause an increase in the production cost which we may not be able to pass on to our customers. Although, in past three years, we have not faced any significant interruption in power supply we cannot assure you that we will not be forced to approach third parties power suppliers for availing power supply in addition to the amount sanctioned to us. We also cannot assure you that we will be able to avail the power supply at prices acceptable to us, or that we will be able to pass on any increase in the price of power supply to our customers. There are limited number of electricity providers in area from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which will negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled "Our Business" on page 128.

32. *Our inability to successfully implement some or all our business strategies in a timely manner or at all could have an adverse effect on our business.*

As part of our ongoing strategy, we have entered into new business segment and aim towards business growth and improvement of market position. Our strategy may not succeed due to various factors, including our limited experience in the new business segments, inability to manage operating costs, our failure to develop new products and services with sufficient growth potential as per the changing market preferences and trends, our failure to execute agreements with our strategic partners, our failure to effectively market our new products and services or foresee challenges with respect to our business initiatives, our failure to establish and from time to time upgrade our infrastructure, machines, automation, equipment and technology as required to cater to the requirements of changing demand and market preferences, our failure to maintain highest quality and consistency in our operations or to ensure scaling of our operations to correspond with our strategy and customer demand, changes in GoI policy or regulation, our inability to respond to regular competition, and other operational and management difficulties. Our new businesses may not perform as anticipated, requiring us to deviate from our plans for such businesses.

33. ***Our consolidated operations depend on our ability to attract and retain employees and skilled workers. Moreover, we may be subject to labour disputes which could adversely affect our business, financial condition, results of operations and cash flows.***

Our ability to remain productive, profitable and competitive and implement our planned growth initiatives depends on our ability to attract and retain skilled employees and workers. While we shall make efforts to retain key employees and to recruit new personnel to adequately meet demands in projects, the loss of a number of personnel or inability to attract additional personnel may have an adverse impact on our business, results of operation, cash flows and financial condition.

India has stringent labour legislations that protect the interests of workers, which includes legislations that set forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment of employees. For instance, in the past (particularly during the period the Company was a sick company and under the revival scheme under the SICA) the Company has faced various issues with ex-employees/ex-workers of the Company, certain contract labours and/or Employees Union) and therefore the Company is involved in various legal proceedings before various fora instituted by certain ex-employees/ex-workers of the Company, certain contract labours and/or employees union challenging the termination and retrenchment of various workers of the Company across several years and seeking compensation for such termination. Most of these legal proceedings are outstanding at various stages while some have been decided against the Company and the Company has appealed against such adverse orders before the relevant fora. We are also engaged in certain litigation relating to gratuity payment and other matters relating to erstwhile employees and union. For details, please see, “***Outstanding Litigation and Defaults***” on page 174.

We cannot assure you that we will not experience disruptions in our present business due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any employee unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations.

34. ***There have been certain instances of non-compliance with respect to maintenance of corporate records of the Company in the past, and certain of our corporate records and filings are not traceable. Consequently, we may be subject to regulatory actions and penalties, if any, for any such non-compliance/ non traceability of corporate records and our business, financial condition and reputation may be adversely affected.***

Our Company endeavours to maintain the corporate record in strict compliance with the Companies Act, Secretarial Standards and other applicable laws. However, certain minutes of the meeting of financial year 2021-22 are not maintained in the strict compliance with the secretarial standards, as stated below:

S. No.	Date of Minutes of Meeting	Type of meeting	Non- Compliance	Legal Action

In addition, the Company has recently undergone many changes in the Company's KMPs and also the Board of Directors. As a result secretarial records and filings from the date of incorporation of the Company in the year 1943 till year 2006 could not be traced as the relevant information was not available in the records maintained by our Company, at the MCA Portal maintained by the Ministry of Corporate Affairs and the RoC, despite conducting searches of our internal records and the records maintained by the jurisdictional RoC for the aforesaid secretarial and other corporate documents and records . We had commissioned a physical and online search of the RoC records through Ms. Reena Jakhodia, a practicing company secretary, to retrieve missing documents in relation to, inter alia, issuances of Equity Shares by the Company. Pursuant to the foregoing, Ms. Reena Jakhodia, the practicing company secretary has issued a certificate dated May 20, 2024, ("PCS Certificate"), confirming that apart from Form-2 i.e. the return of allotment for the equity shares allotted by our Company in year 1993, 1995, 1997, Form 20A for commencement of business, Form 21 for registration of Order for SICA- Sick Industries Companies Act, 1985 and certain forms (Form 32, Form 23, Form 25C) for changes in directors and KMP's, no other documents were retrieved during the search.

While no legal proceedings or regulatory action has been initiated against us in relation to above delayed filings as of the date of this Letter of Offer, we cannot assure you that such proceedings or regulatory actions will not be initiated against us in the future in relation to such filings. We cannot assure you that any such proceedings will not have a material adverse effect on our financial condition or reputation.

The Company has, vide its e-mail dated July 26, 2024, intimated the ROC, Kanpur of the above lapses/delays. In case, any enquiry is initiated against the Company by any of the Regulatory Authorities, for non-submission/non-availability of any such data and records, there may be penal and other implications of the same, thus putting a financial strain on the Company and/or adversely impacting it.

35. *As the securities of our Company are listed on BSE, our Company is subject to certain obligations and reporting requirements under the SEBI LODR Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.*

The Equity Shares of our Company are listed on BSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI LODR Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties. There have been instances in the past wherein, our Company has failed to comply with the requirements of the SEBI LODR Regulations in a timely manner for instance, in the FY19-20, there had been a delayed submission of the Annual Report, in the FY 20-21, there was a delayed submission of related party disclosure, the Company had not obtained approval of shareholders by special resolution for the payment of annual remuneration to Mr. Partho Pratim Kar, a Non- Executive Non-Independent Director of the Company in terms of SEBI LODR Regulations for FYs 2021 and 2022, the Company has made delayed submission of Regulation 31 – Shareholding Pattern and Regulation 33 (Limited review report for the quarter ended June 30, 2022) to which the BSE had imposed fines of Rs. 2,360 and Rs. 11,800 respectively and the Company has duly paid the fines as imposed by the BSE, and delay in appointment of Independent Director of the Company on the Board of unlisted material subsidiary. The Company has, vide its e mail dated July 26, 2024, intimated the above lapses/ delays to BSE. Further, even 100% of the Promoters holding is not in Dematerialised form, in respect of which the Company had on May 04, 2017 filed an Exemption Application with BSE, but no response has been received from BSE on the same. For more details, please refer Risk Factor No. 43 on Page No 66, “100% of the shareholding of our Promoter group is not dematerialized.” In case BSE initiates any enquiry or issue any penalty notice for any of the default/lapse, the same will put a financial strain on the Company and/or adversely impact it.

Further, SEBI had, vide its order bearing no. Order/SS/RK/2023-24/29750 dated November 9, 2023 imposed a penalty of Rs. 5,00,000 under Section 15 A(a) of Securities and Exchange Board of India Act, 1992 (“SEBI Act”) and Rs. 5,00,000 under Section 15HB of SEBI Act on the Company for violation of provisions of Regulation 7(4) of SEBI LODR Regulations and Regulation 9A(1)(b), Regulations 14(2)(h) and 18(1), of Securities and Exchange Board of India (Registrars to an Issue and Share Transfer Agents) Regulations, 1993 and SEBI circulars w.r.t. instructions to Registrars to an Issue/ Share Transfer Agents in respect of the inspection carried out by SEBI for the period April 1, 2020, to December 31, 2021.

In past one year from the date of filing the Letter of Offer, our Company has complied with all the filing and disclosure requirement as required under the SEBI LODR Regulations and our Company shall

endeavour to comply with all obligations/reporting requirements under various regulations framed by SEBI and/or Stock Exchanges. However, there may be instances of non-disclosures/ delayed/ erroneous disclosures and/or any other violations which may be committed by us, and the same may result in imposition of penalties and other regulatory actions against our Company and/or persons in default by SEBI and/or Stock Exchanges. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

36. *Our success depends upon our senior management team and skilled personnel and our ability to attract and retain such persons. Any failure to attract and retain such personnel could have an adverse impact on our business, financial conditions and result of operations.*

We are highly dependent on our executive directors, our senior management, and our other key managerial personnel for our business. Attracting and retaining talented professionals is key to our business growth. Our business model is reliant on the efforts and initiatives of our senior level management and our key managerial personnel. If one or more members of our senior management team were to leave their present positions, it may be difficult to find adequate replacements and our business could be adversely affected. In this regard, we cannot assure you that we will be able to retain our skilled senior management or managerial personnel or continue to attract new talents in the future. Failure to effectively manage labour or failure to ensure availability of sufficient labour could also affect the business operations of the Company.

37. *Our insurance coverage may not be sufficient or may not adequately protect us against all material hazards, which may adversely affect our business, results of operations, financial condition and cash flows.*

We maintain insurance coverage in accordance with industry standards that we believe is adequate for our operation. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limit on coverage. There can however be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. A successful enforcement of one or more claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, financial condition, cash flows and results of operations.

We have obtained insurance coverage, to the extent deemed necessary by our Management. The following table sets forth details of our insurance coverage taken:

38. *Our Promoters, Directors and Key Management Personnel are interested in our Company other than reimbursement of expenses or normal remuneration or benefits.*

Our Promoter, Director and Key Management Personnel are interested in our Company to the extent of being the Promoter, Director and Key Management Personnel of our Company and to the extent of their shareholding and dividends payable to them and may also be regarded as interested to the extent of, among other things such as, remuneration, sitting fee, and other perquisites, as may be applicable.

39. *We are dependent on our R&D activities for our future success. If we do not successfully develop new products or continue our product portfolio expansion in a timely and cost-effective manner, our business, financial condition, cash flows and results of operations may be adversely affected.*

Currently, our Company has not incurred expenses related to R&D activities. However, our future results of operations w.r.t., new business segments may depend, to a significant degree, on our ability to successfully develop new products and continue our product portfolio expansion in a timely and cost-effective manner. In addition, we intend to establish our research capabilities in order to ensure rapid product innovation. The development and commercialization of new products are complex, time-consuming, costly and involves a high degree of business risk. We may be unable to successfully create these new products or encounter unexpected delays in the launch of these products and even if launched as planned, such products may not perform as we expect. The success of our new product offerings will depend on several factors, including our ability to properly anticipate customer needs; obtain timely regulatory

approvals; establish collaborations with suppliers and customers; develop and manufacture our products in a timely and cost-effective manner through our R&D efforts; and successfully sell our products.

Additionally, some of our competitors in a Digital segment may have greater financial, research and technological resources. They may also be in a better position to identify market trends, adapt to changes in industry and offer innovative new products. Accordingly, if we do not successfully develop new products or continue our product portfolio expansion in a timely, cost-effective manner that is attractive to our customers, our business, financial condition, cash flows and results of operations may be adversely affected.

40. We may be unable to respond to technological advances and emerging industry standards in relation to the products we manufacture and intend to manufacture.

Changes in technology may make newer plants or equipment more competitive than ours or may require us to make additional capital expenditures to upgrade our facilities. Our future success will depend in part on our ability to respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. We cannot assure you that we will be able to successful in establishing and upgrading plants and equipment, implement new technologies or adapt our processing systems to emerging industry standards.

41. Our Company has not paid any dividends in the past three years and we may not be able to pay dividends in the future.

Our Company has not declared dividends for last three financial years and our Company may not be able to declare dividends in the future. The declaration, payment and amount of any future dividends is subject to the discretion of the Board and Shareholders, and will depend upon various factors, inter alia, our earnings, financial position, capital expenditures and availability of profits, restrictive covenants in our financing arrangements and other prevailing regulatory conditions from time to time. Any of these factors may thus restrict our ability to pay dividends in the future. If we are unable to pay dividends in the future, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

42. Any failure of our joint venture partner(s) to perform its obligations could impose additional financial and performance obligations resulting in reduced profits or, in some cases, significant losses from the joint venture.

Our Company has entered into various joint venture/ collaboration agreements inter-alia a collaboration agreement with Additive 3D, a partnership firm (A3D partners), dated November 02, 2022, and November 14, 2022, under which the Company will set up the entire additive manufacturing lab ("AM Lab") and meet the capital cost pertaining to the AM lab, so set up.

The Company has also entered into a Joint Venture with Phillips Machine Tools India Private Limited, a subsidiary of Phillips Corporation, USA, to form and constitute a Limited Liability Partnership (LLP) under the name and style of JK Phillips LLP pursuant to the Limited Liability Partnership Agreement dated December 20, 2023. The LLP has been formed to carry out the business of trading and distribution of

Advance systems which includes CNC machines, lathes, hydraulic press, 3D printers, moulding machines and accessories originally produced by Phillips and other manufacturing/trading activities including after-sales services.

If our joint venture/ collaboration partners fail to perform these obligations satisfactorily, the joint venture may be unable to perform adequately or deliver its contracted services and we may be required to fulfil their part of obligation. These additional obligations could result in reduced profits or, in some cases, significant losses for us.

43. *100% of the shareholding of our Promoter group is not dematerialized.*

Certain shares appearing in the name of our Promoter Group are in physical form and are not dematerialized. In accordance with SEBI Circular CIR/CFD/CMD/13/2015 dated November 30, 2015, 100% of promoters and promoter group shareholding in must be dematerialised form. As on date, the Company is unable to get the dematerialisation of 100% of the shares held by certain persons whose name is appearing in the promoter group in dematerialised form due to the reason stated below;

- Gaur Hari Singhania Jointly with Vasantlal D. Mehta & Raghbir Prasad Singhania, were holding 100 Equity shares, in capacity of Executors to the Will of Late Shri P.D. Singhania. However, all the said three Executors have passed away and the shares are yet to be distributed amongst the legal heirs of Late Shri P.D. Singhania and thus such shares are not in dematerialised form.
- 200 equity shares are held by Yadu Securities Private Limited and 100 equity shares are held by G. H. Securities Private Limited. Yadu Securities Private Limited and G.H. Securities Private Limited have been wound-up and dissolved pursuant to the order of Hon'ble High Court of Judicature at Allahabad in 2017 and the shares held by them are not dematerialized. However, as on date, their names still continue to appear in the Promoter Group in the shareholding pattern of our Company.

With respect to the above shares held in physical form, our Company in past had made exemption applications to BSE for grant of exemption from the strict compliance vide our Letter dated May 04, 2017 with SEBI Circular bearing circular no. CIR/CFD/CMD/13/2015 dated November 30, 2015. However, we have not received any response from BSE and no adverse action has been undertaken by BSE till date. However, we cannot assure you that an adverse order would not be passed by BSE or SEBI in this regard.

44. *The formalities for transfer of title of certain of our premises may be incomplete. If our rights to these properties are challenged, we may have to vacate these premises, which may affect our business and operations.*

Property records in India have not been fully computerised and are generally maintained and updated manually through physical records of all land-related documents. In certain cases, our name may not have been updated in the land records (including revenue records and mutation extracts) as owners of the land. There can be no assurance that we would be able to enforce our rights under the relevant sale deed, and any inability to do so could impair our operations. Further, certain of our premises and premises of our Wholly Owned Subsidiaries, Associates etc. are located on leased/ rented premises which are subject to renewal and is presently due for renewal, for instance our own registered office in Kanpur and our manufacturing

facilities which we manage under our group entities. Any of these lease agreements can be terminated, and any such termination could result in any of these premises being shifted or shut down. There can be no assurance that we will, in the future, be able to retain and renew the leases for the existing locations on same or similar terms, or will be able to find alternate locations for these premises on similar terms favourable to us, or at all. In addition, sale or lease agreements are required to be duly registered and adequately stamped under Indian law and if any of our property agreements are not duly registered and adequately stamped, we may face challenges in enforcing them and they may be inadmissible as evidence in a court in India subject to penalties along with the requisite stamp duty prescribed under applicable Indian law being paid.

45. *We may be unable to enforce our rights under some of our agreements on account of inadequate stamping and not registering the agreements or other reasons.*

We regularly enter into agreements with third parties, in relation to our business, leasing of immovable properties among others. The terms, tenure and the nature of the agreements vary, depending on, amongst other things, the subject matter of the agreement and the third parties involved. Although, we duly execute our documents, some of the documents executed by us may be inadequately stamped or not registered or may not otherwise be enforceable. For instance, (i) the rent agreement entered with JK Cotton Limited for using the premises situated at 4th Floor, JK Building, Plot No. 2, Local Shopping Complex, Masjid Moth, Greater Kailash -2 , New Delhi on leave and license basis by JK Cotton Limited is inadequately stamped and is due for renewal; Further, the same premises are being used by our Wholly Owned Subsidiary, JK Defence & Aerospace Limited and our Step down Subsidiary, JK Digital & Advance Systems Private Limited on the basis of No Objection Certificate from JK Cotton Limited. Further the Joint Venture and Shareholder Agreement with M/s Additive 3D Pte Ltd is unstamped. Neumesh Labs has its manufacturing plant at Plot No. 477B, 4th Phase, Peenya Industrial Area, Bangalore, Karnataka, pursuant to Rent Agreement dated May 31, 2022, pursuant to which it has taken the space on rent for a period of more than 11 months, but same is not registered. Such inadequately stamped or unregistered documents may not be admissible in evidence in a court of law until the applicable stamp duty, with penalty, has been paid and registered, which could, therefore, impact our ability to enforce our rights under the agreements in a timely manner or at all.

ISSUE SPECIFIC RISK

46. *Our Company will not distribute the Letter of Offer, the Abridged Letter of Offer and Application Form to overseas Shareholders who have not provided an address in India for service of documents.*

Our Company will dispatch the Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the "**Issuing Materials**") to such Shareholders who have provided an address in India for the service of documents. The Issuing Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e- mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Issuing Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

47. SEBI has recently, by way of a Master Circular streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars, and in this Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 06, 2020, July 24, 2020, January 19, 2021 and April 22, 2021, October 01, 2021 and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, please refer to "**Terms of the Issue**" beginning on page 207.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI ICDR Master Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account (namely, "JAYKAY ENTERPRISES LIMITED - RIGHTS ESCROW DEMAT ACCOUNT") opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

48. The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form ("Physical Shareholder") may lapse in case they fail to furnish the details of their de-mat account to the Registrar.

In accordance with the SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow de-mat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their de-mat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their de-mat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 03, 2018 issued by the SEBI, with effect from April 01, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

49. The Equity Shares of our Company, in the past, had been subjected to Surveillance measures by BSE and Additional Surveillance Measures (ASM) and/ or Enhanced Surveillance Measures (ESM) have been imposed by the BSE.

The scrip of our Company, in the past had been subjected to surveillance measures and had been categorized under ASM as well as ESM. These surveillance measures carry a lot of trading stringencies on the Company and once included in the list, are retained therein for a minimum stipulated period, which may vary from 5/15 trading days/1 month/ 3 months, depending upon the stage. In the event our scrip continues to remain under ASM/ ESM and if it meets the entry criteria as on the review date, more stringent action could be taken by the Stock Exchange. As on date we have qualified the exit criteria notified by the BSE but cannot assure non-occurrence of same again. Any such events could have an impact on the liquidity of our scrip.

50. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, please refer to "***Terms of the Issue***" beginning on page 207.

51. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

52. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the

Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

- 53. *You may not receive the Equity Shares that you subscribe to in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe to in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

- 54. *There is no guarantee that our Equity Shares will be listed in a timely manner or at all, which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

- 55. *Holder of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

56. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

57. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTOR

58. Adverse geopolitical conditions such as increased tensions between India and its neighboring countries, could adversely affect our business, results of operations and financial condition.

Adverse geopolitical conditions such as increased tensions between India and its neighbouring countries, resulting in any military conflict in the region could adversely affect our business and operations. Such events may lead to countries including the Government of India imposing restrictions on the import or export of products or raw materials, among others, and affect our ability to procure raw materials required for our manufacturing operations. We could also be affected by the introduction of or increase in the levy of import tariffs in India, or in the countries to which we export our products, or changes in trade agreements between countries. For instance, the Government of India has imposed additional tariffs in the nature of countervailing duty and anti-dumping duty on a number of items imported from China. Any such measure which affects our raw material supply or reciprocal duties imposed on Indian products by China or other countries may adversely affect our results of operations and financial condition.

59. Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could

depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

60. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

61. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash*

flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

62. We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.

We are incorporated in India, and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighboring countries;
- hostile or war like situations with the neighboring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

SECTION III - INTRODUCTION

THE ISSUE

This Issue has been authorized through a resolution passed by our Board at its meeting held on July 9, 2023, pursuant to Section 62(1)(a) of the Companies Act and other applicable laws. GLOBAL OUTLOOK

Summary of World Economic Outlook

Global growth, estimated at 3.2 percent in 2023, is projected to continue at the same pace in 2024 and 2025. Throughout the global disinflation of 2022–23, economic activity demonstrated surprising resilience. As global inflation descended from its mid-2022 peak, economic growth continued steadily, defying predictions of stagflation and global recession. Employment and income levels remained stable, buoyed by supportive demand factors such as higher-than-expected government spending and robust household consumption. Additionally, there was a significant supply-side expansion, notably marked by an unexpected increase in labor force participation. This economic resilience persisted despite substantial interest rate hikes by central banks aimed at restoring price stability. This endurance can be attributed to households in major advanced economies leveraging substantial savings accumulated during the pandemic. Furthermore changes in mortgage and housing markets during the decade of low interest rates prior to the pandemic helped mitigate the immediate impact of policy rate hikes. As inflation approaches target levels and central banks in many economies shift toward policy easing, it is anticipated that fiscal policies will tighten to address high government debt, potentially slowing growth due to higher taxes and reduced government spending. The forecast for 2024 has been revised up by 0.1 percentage point from the January 2024 World Economic Outlook (WEO) Update, and by 0.3 percentage point from the October 2023 WEO. This pace of expansion is considered low by historical standards due to near-term factors such as still-high borrowing costs and the withdrawal of fiscal support, as well as longer-term effects from the COVID-19 pandemic and Russia’s invasion of Ukraine, weak growth in productivity, and increasing geoeconomic fragmentation. Global headline inflation is expected to decline from an annual average of 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. The latest forecast for global growth five years from now—at 3.1 percent—is the lowest in decades.

The pace of convergence toward higher living standards for middle- and lower-income countries has slowed, indicating persistent global economic disparities. The relatively weak medium-term outlook reflects lower growth in GDP per person, notably due to persistent structural frictions preventing capital and labor from moving to more productive firms. Risks to the global outlook are now broadly balanced. On the downside, new price spikes stemming from geopolitical tensions, including those from the war in Ukraine and the conflict in Gaza and Israel, could, along with persistent core inflation where labor markets are still tight, raise interest rate expectations and reduce asset prices. A divergence in disinflation speeds among major economies could also cause currency movements that put financial sectors under pressure.

High interest rates could have greater cooling effects than envisaged as fixed-rate mortgages reset and households contend with high debt, causing financial stress. In China, without a comprehensive response to the troubled property sector, growth could falter, hurting trading partners. Amid high government debt in many economies, a disruptive turn to tax hikes and spending cuts could weaken activity, erode confidence, and sap support for reform and spending to reduce risks from climate change. Goeconomic fragmentation could intensify, with higher barriers to the flow of goods, capital, and people implying a supply-side slowdown. On the upside, looser fiscal policy than necessary and assumed in projections could raise economic activity in the short term, although risking more costly policy adjustment later on. Inflation could fall faster than expected amid further gains in labor force participation, allowing central banks to bring easing plans forward. Artificial intelligence and stronger structural reforms than anticipated could spur productivity.

As the global economy approaches a soft landing, the near-term priority for central banks is to ensure that inflation touches down smoothly, by neither easing policies prematurely nor delaying too long and causing target undershoots. At the same time, as central banks take a less restrictive stance, a renewed focus on implementing medium-term fiscal consolidation to rebuild room for budgetary maneuver and priority investments, and to ensure debt sustainability, is in order. Cross-country differences call for tailored policy responses. Intensifying supply-enhancing reforms would facilitate inflation and debt reduction, allow economies to increase growth toward the higher pre-pandemic era average, and accelerate convergence toward higher income levels. Multilateral cooperation is needed to limit the costs and risks of goeconomic fragmentation and climate change, speed the transition to green energy, and facilitate debt restructuring.

INDIAN ECONOMY

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 295.36 lakh crores (US\$ 3.54 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-June 2025, India's exports stood at US\$ 109.11 billion, with Engineering Goods (25.35%), Petroleum Products (18.33%) and electronic goods (7.73%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the

tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 173.82 lakh crores (US\$ 2.08 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 23.2 billion for the 2023-24 compared to US\$ 67.0 billion or 2.0% of GDP in the preceding year. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made

across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of July 5, 2024, India's foreign exchange reserves stood at US\$ 657.15 billion.
- In May 2024, India saw a total of US\$ 6.9 billion in PE-VC investments.
- Merchandise exports in June 2024 stood at US\$ 35.20 billion, with total merchandise exports of US\$ 109.96 billion during the period of April 2024 to June 2024.
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- In June 2024, the gross Goods and Services Tax (GST) stood at highest monthly revenue collection at Rs. 1.74 lakh crore (US\$ 20.83 billion) vs Rs. 1.73 lakh crore (US\$ 20.71 billion)
- Between April 2000–March 2024, cumulative FDI equity inflows to India stood at US\$ 97 billion.
- In May 2024, the overall IIP (Index of Industrial Production) stood at 154.2. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 136.5, 149.7 and 229.3, respectively, in May 2024.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.08% (Provisional) for June 2024.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 13.89 billion) in India during January- (up to 15th July) 2024.
- The wheat procurement during Rabi Marketing Season (RMS) 2024-25 (till May) was estimated to be 266 lakh metric tonnes (LMT) and the rice procured in Kharif Marketing Season (KMS) 2024-25 was 400 LMT.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh

crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. Further, In the interim budget for FY24, Government increased FY25 Capex outlay to record Rs.11.11 lakh crore (US\$ 133.5 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

DEFENCE MANUFACTURING INDUSTRY

Introduction

India is one of the strongest military forces in the world and holds a place of strategic importance for the Indian government. The top three largest market segments of the Indian defence sector are military fixed wing, naval vessels and surface combatants, and missiles and missile defence systems. Military rotorcraft, submarines, artillery, tactical communications, electronic warfare, and military land vehicles are some of the other well-known segments. Some of the major defence manufacturing companies in India are Bharat Earth Movers Ltd. (BEML), Bharat Electronics Ltd. (BEL), and Hindustan Aeronautics Ltd. (HAL).

The Indian defence manufacturing industry is a significant sector of the economy. The industry is likely to accelerate with rising concerns of national security. Demand for defence equipment in India has been growing due to the ongoing territorial disputes with Pakistan and China over the ownership of the Northern State of Kashmir and the North Eastern State of Arunachal Pradesh, respectively. Over the last five years, India has been ranked among the top importers of defence equipment to gain technological advantages over rival countries such as China and Pakistan. To modernize its armed forces and reduce dependency over external dependence for defence procurement, several initiatives have been taken by the government to encourage 'Make in India' activities via policy support initiatives.

India's defence budget of US\$ 74.7 billion ranked fourth highest globally in 2024. India has the world's fourth largest defence expenditure, as of 2022, and has set a target of US\$ 6.02 billion (Rs. 50,000 crore) worth of annual defence exports by 2028-29.

In the Interim Budget 2024-25, US\$ 2.9 billion (Rs. 23,855 crore) was allocated to DRDO, while a corpus of US\$ 12.0 billion (Rs. 1 lakh crore) was earmarked for Deep Tech, offering long-term loans to tech-savvy companies to foster innovation in defence technologies within India.

As per the Union Budget 2022-23, 25% of the defence R&D budget has been earmarked for private industry and start-ups which will pave the way for the innovation of new defence technologies in India.

Till April 2023, a total of 606 industrial licences were issued to 369 companies operating in the defence sector. Defence exports rose 240% over five years in FY23, to US\$ 1.9 billion (Rs. 15,918.16 crore). India now exports to over 85 countries due to collaborative efforts.

Defence exports US\$ 2.63 billion in FY23-24 up by 32.5% from last year. Till October 2022, a total of 595 Industrial Licences have been issued to 366 companies operating in Defence Sector. Defence exports grew by 334% in the last five years; India now exports to over 75 countries due to collaborative efforts.

Market Size

According to the Global Power Index, the Indian defence sector ranks fourth in terms of firepower with a score of 0.0979. The Indian government has set the Defence production target at US\$ 25 billion by 2025 (including US\$ 5 billion from exports by 2025). India is one of the world's biggest Defence spenders with a total outlay of Rs. 5.25 lakh crore (US\$ 66 billion), accounting for 13.31% of the total budget and indicating an increase over the budget estimates of 2021-22 by Rs. 46,970 crore (US\$ 5.9 billion).

India's military spending of US\$ 76.6 billion ranked third highest in the world in 2021. This was up by 0.9% from 2020 and by 33% from 2012.

The value of defence production in the country crossed Rs. 1 lakh crore (US\$ 12 billion) for the first time on the back of key reforms to spur growth in the sector that holds vast potential. The figure stood at Rs. 1,08,330 crore (US\$ 13.07 billion) in FY23 compared to Rs. 95,000 crore (US\$ 11.47 billion) in FY22 and Rs. 54,951 crore (US\$ 6.63 billion) five years ago.

India's defence import value stood at US\$ 463 million for FY20 and US\$ 469.5 million in FY21. India targets to export military hardware worth Rs. 35,000 crore (US\$ 5 billion) in the next five years. DIGITAL MANUFACTURING AND ADVANCED SYSTEMS

Introduction

Emerging technologies, such as the Internet of Things, big data, artificial intelligence etc., have already transformed major segments of the economy. Rapid transformation has also been witnessed in next generation manufacturing. Improvements in productivity and automation have already been achieved using digital technologies in conventional manufacturing. Next generation manufacturing has shifted priorities to sustainability, speed-to-market, agility for mass products and supply chain resiliency.

Additive Manufacturing (AM) is defined as the technology that constructs a three-dimensional object from a digital 3D model or a CAD model by adding material layer by layer. The addition of material can

happen in multiple ways, namely power deposition, resin curing and filament fusing. The deposition and solidification are controlled by computer to create a three-dimensional object.

Additive Manufacturing is ushering the world into an Industrial Revolution 4.0, offering immense potential that could revolutionize India’s manufacturing and industrial production landscape through digital processes, communication, imaging, architecture and engineering that provide digital flexibility and efficiency.

Additive Manufacturing Process

Additive Manufacturing technologies are essentially classified into virtual and physical models. The virtual model represents computational models and applications for simulation and optimization. The physical model represents three-dimensional virtual design models that are then speedily fabricated into a physical object. This process is known as rapid prototyping.

The Additive Manufacturing process is detailed below:

Fig.6 Basic Additive Manufacturing process

Design

The Additive Manufacturing process begins with a software programme used to design a digital model for prototyping a physical object, a process referred to as Computer Aided Design. A digital model may also be created through reverse engineering using a 3D scanner. The validation of the technical and commercial feasibility of producing components at pre-production volumes is allowed under AM. Related simulations tools along with production planning are used to capture the shape distortion in the building of a component so geometric adjustments are understood in advance; to find the melt pool dynamic and residual stress state in the ready component which can be disastrous to its load carrying capacity; to improve the building sequence and/or energy deposition in order to improve the state of the component.

STL conversion and file manipulation

The digital model is then converted to a Stereolithography file (STL). STL breaks it down into a series of polygons, which represent surfaces of an object, and the model is then fed to a slicer programme/ Computer Aided Manufacturing software (CAM). CAM converts the STL file into a numerical control (NC) programming language - G Code, through which it directly communicates with the machine. This allows customization of design parameters like part orientation, layer height etc.

Printing

American Society for Testing and Materials (ASTM) has classified Additive Manufacturing processes, broadly into seven categories, each supported by specific materials and laser-based technologies. As defined by ASTM Committee F42, the 7 categories of AM process are summarized below:

Process	Technology	Material	Applications
Vat Photopolymerization: a process to selectively cure liquid photopolymer in a vat by light-activated polymerization.	Stereo lithography (SLA), digital light processing (DLP)	Photopolymers	Prototyping, Consumer Toys, Electronics, Guides and Fixtures.
Binder Jetting: a process to selectively deposit liquid bonding agent to join powder materials	Powder bed and inkjet head (PBIH), plaster-based 3D printing (PP)	Polymers, Waxes	Prototyping and Tooling
Directed Energy Deposition: process in which focused thermal energy ((e.g. laser, electron beam, or plasma arc) is used to fuse materials by melting as they are being deposited	Laser metal deposition (LMD)	Metals	Repairing or building-up of high-volume parts
Material Extrusion: a process to selectively dispense material through a nozzle or orifice	Fused deposition modelling (FDM)	Polymers	Prototyping, Tooling and Office manufacturing
Material Jetting: process in which droplets of build material are selectively deposited	Multi-jet modelling (MJM)	Polymers, Waxes	High Resolution Prototypes, Circuit Boards and other electronics, Consumer products and Tooling
Powder Bed Fusion: process in which thermal energy selectively fuses regions of a powder bed	Electron beam melting (EBM), selective laser sintering (SLS), selective heat sintering (SHS), and direct metal laser sintering (DMLS)	Metals, Polymers	Aerospace, Automotive, Medical products, Tooling and Dental implants
Sheet Lamination: a process to bond sheets of material to form an object	Laminated object manufacturing (LOM), ultrasonic consolidation (UC)	Paper, Metals	Large parts and Tooling

Additive Manufacturing Materials

In myriad applications, the following material categories have been revolutionary in Additive Manufacturing.

(i.) Thermoplastics

Thermoplastic polymers are the most popular types of AM materials. Acrylonitrile butadiene styrene (ABS), polycarbonate (PC) and polylactic acid (PLA) each offer distinct advantages in different applications. Water-soluble polyvinyl alcohol (PVA) is typically used to create temporary support structures, which are later dissolved away.

(ii.) Metals

Different metals and metal alloys are used in additive manufacturing, which include precious metals like gold and silver to strategic metals like stainless steel and titanium.

(iii.) Ceramics

A variety of ceramics including zirconia, alumina and tricalcium phosphate are also used in additive manufacturing. Also, alternate layers of powdered glass and adhesive are baked together to develop entirely new classes of glass products.

(iv.) Bio Materials

The biomaterials used in AM applications include the hardened material like silicon, calcium phosphate and zinc to support bone structures as new bone growth occurs. The bio-inks fabricated from stem cells are also being explored by researchers to form blood vessels, bladders and many other human organs. Also, 3D Printing of human organs such as liver tissues, kidney, heart etc are being printed using biomaterials and living cells.

Post Processing

The material needs to be heat treated after AM to get the desired microstructure and mechanical properties. Further reduction of porosity by hot isostatic pressing (HIP) may additionally be required for some applications. The post-process treatments, generally used on conventional produced, are also applicable to AM produced parts. Post processing has the following five major stages like stress relieving, part separation from supports, post heat treatment (to achieve required metallurgical properties), surface roughness improvement, and final machining (to achieve profiles and geometries).

Global Market

Global spending on AM in 2019 was nearly \$13.8 Bn with a growth of 23.5% per annum and expected to reach \$34.8 Bn by 2024, which is growing at CAGR of 23.25%. Smar Tech Publishing had estimated the global AM market at \$14Bn in 2020 and would reach \$41 Bn by 2027, with a year-on-year growth of 27%. USA's market 10% share on AM is 36%, followed by EU as 26% and China 14% and India holding a meagre 1.4 % of the global market share.

As per International Development Corporation (IDC), Asia's AM spending is estimated at US\$ 3.8 billion for 2019, after the United States and Western Europe which account for nearly two-thirds of the overall market (US\$ 8.6 billion).

Despite this impressive growth, Additive Manufacturing accounts for only around 1% of the global manufacturing revenue and may eventually account for only 5% -10% of total global manufacturing. However, given its revolutionary potential and inherent advantages, a necessary ecosystem must be created and nurtured for maximum adoption and proliferation.

Growth in Market Value

The AM market globally focused on the sectors including automotive, consumer products, medical, business machines, aerospace, government/military, academic and others. Automotive or motor vehicles account for the largest share in this market due to its easy applications in the production of end-products (engines, spare parts, other interior, and exterior parts) as compared to other segments such as consumer products and business machines, which have limited usage in manufacturing of end-products. The major drivers to propel global AM market are new and improved technologies, financial support from governments, large application area, rapid product development at a low cost, and ease of development of custom products.

Fig.3 Growth path of Global Additive Manufacturing Market

Geographic Trends

The global online 3D printing demand is primarily generated by USA, and UK. US alone amounts to nearly 50% of the worldwide demand for 3D printed parts while UK stands at 18%. Other demands are mostly coming from developed countries of North America, Europe and Australia. India along with China is still producing low demands for AM printed parts as compared to developed countries.

Indian Market

In comparison to some of the leading countries across the globe such as the US, China, Germany and Japan, the adoption of AM hasn't seen as much traction in India. However, it has generated considerable interest in the Indian manufacturing ecosystem, due to its potential to support tremendous socio-economic growth.

National Development

Detailed below are some initiatives undertaken by various stakeholders to develop a domestic AM ecosystem in India.

Government Led Efforts

Establishment of 3D printing Manufacturing Lab at National Institute of Electronics & Information Technology, Aurangabad. The Institute also offers a certificate course in 3D Printing.

- **Atal Innovation Mission:** Under the aegis of Atal Innovation Mission, Atal Tinkering Labs, 1200-1500 square feet dedicated innovation workspaces have been set up, where do-it-yourself (DIY) kits on latest technologies like 3D Printers, Robotics, Internet of Things (OT), Miniaturized electronics are installed through government financial support of Rs 20 Lakhs so that students from Grade VI to Grade XII can tinker with these technologies and learn to create innovative solutions. As part of the programme, some initiatives such as 3D design challenges were also launched.
- The Gujarat government has signed an MoU with the US Institute of 3D Technology (USISDT) in California, and OEM 3D systems (a leading global 3D printing companies) for establishing seven 3D printing Centres of Excellence across seven engineering colleges and technical institutes in the state.
- Andhra Pradesh MedTech Zone collaborated with University of Wollongong to set up a 3D Bioprinting Lab.

Conclusions

Additive manufacturing technology opens up new opportunities for socio economic growth through cost effective and more flexible manufacturing eco-system. AM technology offers an alternative path to the developing countries to overcome industrial competitiveness without substantial investment in physical infrastructure.

Fast evolving AM technology is impacting global production processes with advancement of industrial AM, where significant breakthroughs are expected in near futures. The conventional manufacturing may completely replace small production domain, where mass customization holds the key. Foreign countries are aggressively promoting AM technology through significant financial support and other policy measures for capturing global manufacturing space _ in emerging business opportunities. If India fails to cope with the pace of AM innovation, it may lose control of technologies, which are being embedded in future strategic and commercial products.

The National Strategy on Additive Manufacturing is, therefore, imperative to keep pace with technology, identifying AM's likely path for development, and devising prudent strategy to navigate the path for future economic growth. The adoption and diffusion of this emerging technology would require new standards,

knowledge, and infrastructure to facilitate its use. Innovation and R&D ecosystem engaging academia and industry participations would, therefore, be important for realizing the fruits.

The Strategy aspires to achieve 5% of Global AM market share and thereto add nearly \$1Bn to the GDP by 2025. This will create eco-system for various economic activities, such as, creation of nearly 100 new Start-ups, 10 AM sectors, 1 lakh new skilled manpower, besides, development of 500 AM products and SO Indian AM technologies on material, machine, process and software. In addition, awareness for adoption of AM products to facilitate this growth will be created.

Emphasis of Matter

We draw attention to the following with regards to Nebula3D Services Private Limited(An Associate Company) :

Going Concern

The Company has substantial accumulated losses carried forward from the previous year and has incurred significant losses during the current year and previous financial years resulting in erosion of net worth as at 31 March 2024. However, the financial statements of the Company have been prepared on a going concern basis based on the financial support confirmed by the shareholders and other reasons stated in the notes to the financial statements of associate.

Our opinion is not modified in respect of this matter.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013 (the Act). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Results section of our report. We are independent of the Group including its associate in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence obtained by us and other auditors in terms of their reports referred to in "Other Matter" paragraph below, is sufficient and appropriate to provide a basis for our opinion.

Management's Responsibilities for the Consolidated Financial Results

These quarterly financial results as well as the year-to-date consolidated financial results have been prepared on the basis of the consolidated annual audited financial statements.

The Company's Board of Directors are responsible for the preparation and presentation of these consolidated financial results that give a true and fair view of the net profit and other comprehensive income and other financial information of the Group including its associates and partnership firm in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, 'Interim Financial Reporting' prescribed under Section 133 of the Act read with relevant rules issued there under and other accounting principles generally accepted in India and in compliance with Regulation 33 and Regulation 52 of the Listing Regulations. The respective Board of Directors of the Group and its associate entity are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and its associates and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial results that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial results by the Directors of the Company, as aforesaid.

In preparing the consolidated financial results, the respective Board of Directors of the group and its associates are responsible for assessing the ability of the Company and of its associates to continue as a going concern, disclosing, as applicable, matters related to going

concern and using the going concern basis of accounting unless the respective Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the group and its associates are responsible for overseeing the financial reporting process of the company and of its associates.

Auditor's Responsibilities for the Audit of the Consolidated Financial Results

Our objectives are to obtain reasonable assurance about whether the consolidated financial results as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial results.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial results, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than from one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Company and its associates to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial results or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company and its associates entities to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial results, including the disclosures, and whether the consolidated financial results represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial results/financial information of the entities within the company and its associates entities to express an opinion on the consolidated Financial Results. We are responsible for the direction, supervision and performance of the audit of financial information of such entities included in the consolidated financial results of which we are the independent auditors. For the

other entities included in the consolidated Financial Results, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial results of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

We also performed procedures in accordance with the circular issued by the SEBI under Regulation 33(8) of the Listing Regulations, as amended, to the extent applicable.

**INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF JAYKAY ENTERPRISES LIMITED
Report on the Audit of the Consolidated Financial Statements**

Opinion

We have audited the accompanying consolidated financial statements of Jaykay Enterprises Limited ("hereinafter referred to as the "Holding Company") and its Subsidiary ("hereinafter referred to as "the Group"), its associate, which comprise the consolidated Balance Sheet as at March 31, 2023, and the consolidated statement of Profit and Loss (including other comprehensive income), the consolidated statement of changes in equity and the consolidated cash flows Statement for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies (hereinafter referred to as "the consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of their consolidated state of affairs of the Group as at March 31, 2023, of consolidated Profit, consolidated changes in equity and its consolidated cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by ICAI together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the consolidated financial statements.

Emphasis of Matter

We draw attention to the Comments of Statutory Auditors of Nebula3D Services Private Limited (An Associate Company) in their Auditors Report as under:

Going Concern

The Company has substantial accumulated losses carried forward from the previous year and has incurred significant losses during the current year and previous financial years resulting in erosion of net worth as at 31 March 2023. However, the financial statements of the Company have been prepared on a going concern basis based on the financial support confirmed by the shareholders and other reasons stated in the notes to the financial statements of associate.

2 We draw attentions to the note no 42 to the consolidated financial statement which reads as under:

M/S Silver Grey Engineer - (a partnership firm) become subsidiary of Jaykay Enterprises Likited w.e.f. 21st April, 2022 during the year. Therefore, line-by-line consolidation of the firm has been done proportionately with effect from 21st April, 2022 to reporting date, i.e. 31st March, 2023.

The values have been taken from audited financial statements of M/s Silver Grey Engineers which have been prepared in accordance with Accounting Standard issued by the Institute of Chartered Accountants of India (ICAI) and there will be no significant impact on profit/loss for the year if financial statements are prepared in accordance with Indian Accounting Standard (Ind AS) issued by ICAI as certified by the auditor of the associate firm.

Our opinion is not modified in respect of above matters.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated Ind AS financial statements for the year ended March 31 2023.

These matters were addressed in the context of our audit of the consolidated Ind AS financial statements and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key Audit Matters to be communicated in our reports.

Sl no.	Reporting	How was the Key Audit Matter addressed in the audit
1	<p>Assessment of Deferred Tax Assets not recognized by the holding company on carry forward of losses Rs. 1517.19 lacs (Refer note 33 to the consolidated financial statements)</p> <p>The recognition and measurement of deferred tax items require determination of difference between the recognition and the measurement of assets, liabilities, income and expenses in accordance with the Income Tax Act and other applicable tax laws including application of ICDS and financial reporting in accordance with Ind AS. Assessment of deferred tax assets is done by the management at the close of each financial year taking into account forecast of future taxable results. Considering the probability of future taxable income, the company had not recognised Deferred tax Assets (DTA) of Rs. 382.00 lacs on carry forward loss of Rs. 1517.19 lacs. We have considered the assessment of deferred tax liabilities and assets as a Key Audit Matter due to the importance of management estimation and judgement and a materiality of the amount.</p>	<p>Principal Audit Procedure Performed</p> <p>i We have tested the period over which the deferred tax assets on unabsorbed losses would be recovered against future taxable income.</p> <p>ii We have tested the management under lying assumption and judgement in estimating the future taxable income.</p>

Our opinion is not modified in respect of above matter.

The Holding Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in Management Discussion and Analysis, Board's Report including Annexure to Board's Report, Corporate Governance and Shareholder's Information, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in term of the requirements of the Act, that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group including its Associates in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act. The respective Board of Directors of the Group and of its associates are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the Companies included in the Group and of its associates are responsible for assessing the ability of the respective entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the their respective entities or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the Group and of its associates are responsible for overseeing the financial reporting process of the Company and of its associates.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Company and its associates to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and its associates to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and its associates to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the one associate included in the consolidated financial statements, which have been audited by other auditor, such other auditor remain responsible for the direction, supervisions and performance of the audits carried out by him .We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**ANNEXURE "C" TO THE INDEPENDENT AUDITORS REPORT OF EVEN DATE ON
THE CONSOLIDATED FINANCIAL STATEMENTS OF JAYKAY ENTERPRISES
LIMITED**

**Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143
of the Companies Act, 2013 ("the Act")**

In conjunction with our audit of the consolidated financial statements of the company as of and for the year ended 31st March, 2023, we have audited the internal financial controls over financial reporting of Jaykay Enterprises Limited ("hereinafter referred to as the "Holding Company") and its Subsidiary ("hereinafter referred to as "the Group"), its associate entity, as of that date.

Management's Responsibility for Internal Financial Controls

The Respective Board of Directors of the Group and its associate entity, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the

Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Group and its associate entity internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Group and its associate entity, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

MATERIAL ACCOUNTING POLICIES

Basis of Preparation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015.

Current and non-current Classification:

The Company presents assets and liabilities in the Balance Sheet based on current/ non-current classification. An asset is treated as current when:

- a. it expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- b. it holds the asset primarily for the purpose of trading;
- c. it expects to realize the asset within twelve months after the reporting period; or
- d. the asset is cash or a cash equivalent (as defined in Ind AS 7) unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

An entity shall classify a liability as current when:

- a) it expects to settle the liability in its normal operating cycle.
- b) it holds the liability primarily for the purpose of trading.

- c) the liability is due to be settled within twelve months after the reporting period; or
- d) it does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

Revenue recognition:

1. Rendering of Services

Revenue from the rendering of services is recognised when the performance of agreed contractual task has been completed.

Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes, levies or duties collected on behalf of the government/ other statutory bodies.

2. Interest

Interest income is recognised using the Effective Interest Method.

3. Dividend

Dividend income from investments is recognised when the rights to receive payment is established.

4. Other Claims

Other claims (including interest on delayed realization from customers) are accounted for when there is certainty of realisation.

Leases:

A finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred.

An **operating lease** is a lease other than a finance lease.

Company as a lessor

Operating leases Lease income from operating leases (excluding amounts for services such as insurance and maintenance) is recognised in income on a straight-line basis over the lease term, unless either:

- (a) another systematic basis is more representative of the time pattern in which use benefit derived from the leased asset is diminished, even if the payments to the lessors are not on that basis; or
- (b) the payments to the lessor are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases. If payments to the lessor vary according to factors other than inflation, then this condition is not met.

Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as lease income.

Finance leases Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

Property, Plant and Equipment (PPE)

Land is carried at historical cost. Historical cost includes expenditure which are directly attributable to the acquisition of the land like, rehabilitation expenses, resettlement cost etc.

After recognition, an item of all other Property, plant and equipment are carried at its cost less any accumulated depreciation and any accumulated impairment losses under Cost Model. The cost of an item of property, plant and equipment comprises:

- a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.
- b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.
- c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item depreciated separately. However, significant part(s) of an item of PPE having same useful life and depreciation method are grouped together in determining the depreciation charge.

Costs of the day to-day servicing described as for the 'repairs and maintenance' are recognised in the statement of profit and loss in the period in which the same are incurred.

Subsequent Measurement

Subsequent costs of replacing parts of an item of property, plant and equipment are recognised in the carrying amount of the item, if it is probable that future economic benefits associated with the item will flow to the Company; and the cost of the item can be measured reliably. The carrying amount of those parts that are replaced is derecognised in accordance with the de recognition policy mentioned below.

When major inspection is performed, its cost is recognised in the carrying amount of the item of property, plant and equipment as a replacement if it is probable that future economic benefits associated with the item will flow to the Company; and the cost of the item can be measured reliably. Any remaining carrying amount of the cost of the previous inspection (as distinct from physical parts) is derecognised.

An item of Property, plant or equipment is derecognised upon disposal or when no future economic benefits are expected from the continued use of assets. Any gain or loss arising on such de recognition of an item of property plant and equipment is recognised in profit and Loss.

Depreciation

Depreciation on property, plant and equipment, except freehold land, is provided on straight line method based on useful life specified in schedule II to the Companies Act, 2013. The residual value of Property, plant and equipment is considered as 5% of the original cost of the asset.

Depreciation on the assets added / disposed of during the year is provided on pro-rata basis with reference to the month of addition / disposal.

Capital Expenses incurred by the company on construction/development of certain assets which are essential for production, supply of goods or for the access to any existing Assets of the company are recognised as Enabling Assets under Property, Plant and Equipment.

Impairment of Assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortized cost and FVTOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

With regard to trade receivable, the Company applies the simplified approach as permitted by Ind AS 109, Financial Instruments, which requires expected lifetime losses to be recognized from the initial recognition of the trade receivables.

The Company assesses at the end of each reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Investment Property

Property (land or a building or part of a building or both) held to earn rentals or for capital appreciation or both, rather than for, use in the production or supply of goods or services or for administrative purposes; or sale in the ordinary course of businesses are classified as investment property.

Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs.

Investment properties are depreciated using the straight-line method over their estimated useful lives.

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

1. Financial assets

1.1 Initial recognition and measurement

All financial assets are recognised initially at fair value, in the case of financial assets not recorded at fair value through profit or loss, plus transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

2. Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments, derivatives, and equity instruments at fair value through profit or loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income (FVTOCI)

2.1 Equity investments in associates

In accordance of Ind AS 101 (First-time adoption of Ind AS), the carrying amount of these investments as per previous GAAP as on the date of transition is considered to be the deemed cost. Subsequently, Investment in subsidiaries, associates and joint ventures are measured at cost.

2.2 Other Equity Investment

All other equity investments in scope of Ind AS 109 are measured at fair value through profit or loss.

For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

2.3 Derecognition of Financial Assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Company's consolidated balance sheet) when:

- The rights to receive cash flows from the asset have expired, or

- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a ‘pass-through’ arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company’s continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

2.4 Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVTOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

With regard to trade receivable, the Company applies the simplified approach as permitted by Ind AS 109, Financial Instruments, which requires expected lifetime losses to be recognised from the initial recognition of the trade receivables.

The Company assesses at the end of each reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. An asset’s recoverable amount is the higher of the asset’s or cash-generating unit’s value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

3. Financial liabilities

3.1 Initial recognition and measurement

The Company’s financial liabilities include trade and other payables, loans and borrowings including bank overdrafts.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

3.2 Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

3.3 Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ losses are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

4. Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount is reported in the consolidated balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Borrowing Costs

Borrowing costs are expensed as incurred except where they are directly attributable to the acquisition, construction or production of qualifying assets i.e. the assets that necessarily takes substantial period of time to get ready for intended use, in which case they are capitalised as part of the cost of those assets up to the date when the qualifying asset is ready for its intended use.

Taxation

Tax expenses for the period comprises current and deferred tax. Tax is recognised in statement of Profit and Loss, except to the extent that it relates to items recognised in the comprehensive income or in equity. In which case, the tax is also recognised in other comprehensive income or equity.

Current Tax: Current Tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted at the Balance Sheet date.

Deferred Tax: Deferred Tax recognised on temporary difference between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

Employee Benefits

i. Short term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

ii. Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided. The company has following defined contribution plans:

- a) Provident fund
- b) Superannuation scheme

iii. Defined benefit plans

The company net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the company, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Re measurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in Other Comprehensive Income. Net interest expense (income) on the net defined liability (assets) is computed by applying the discount rate, used to measure the net defined liability (asset), to the net defined liability (asset) at the start of the financial year after taking into account any changes as a result of contribution and benefit payments during the year. Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The

company recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

The company has following defined benefit plans:

a) Gratuity

The company provides for its gratuity liability based on actuarial valuation of the gratuity liability as at the Balance Sheet date, based on Projected Unit Credit Method, carried out by an independent actuary and contributes to the gratuity fund. The contributions made are recognized as plan assets. The defined benefit obligation as reduced by fair value of plan assets is recognized in the Balance Sheet. Re-measurements are recognized in the Other Comprehensive Income, net of tax in the year in which they arise.

b) Leave Encashment

Leave encashment is payable to eligible employees at the time of retirement .The liability for leave encashment , which is defined benefit scheme , is provided on actuarial valuation as at the Balance Sheet date, based on projected unit credit method , carried out by the independent actuary.

Foreign Currency Transactions

The company's reported currency and the functional currency for majority of its operations is in Indian Rupees (INR) being the principal currency of the economic environment in which it operates.

Transactions in foreign currencies are converted into the reported currency of the company using the exchange rate prevailing at the transaction date. Monetary assets and liabilities denominated in foreign currencies outstanding at the end of the reporting period are translated at the exchange rates prevailing as at the end of reporting period. Exchange differences arising on the settlement of monetary assets and liabilities or on translating monetary assets and liabilities at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognised in statement of profit and loss in the period in which they arise.

Non-monetary items denominated in foreign currency are valued at the exchange rates prevailing at the transaction date.

Inventories

- i) Inventories are valued **“at cost or net realizable value, whichever is lower”** Cost comprises all cost of purchase, cost of conversion and their costs incurred in bringing in inventories to their present location and condition.
- ii) Cost formula used are **“First in First out”** or **“Average Cost”** as applicable.

Cash and cash equivalents

Cash and Cash equivalents in the balance sheet comprise cash at bank and on hand and short-term deposits with original maturity of three months or less, which are subject to an insignificant risk of changes in value.

Provisions, Contingent Liabilities & Contingent Assets

Provisions are recognized when the company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

All provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future uncertain events not wholly within the control of the company, are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

Contingent Assets are not recognized in the financial statements. However, when the realisation of income is virtually certain, then the related asset is not a contingent asset and its recognition is appropriate.

Earnings per share

Basic earnings per share are computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per shares is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per shares and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

Judgements, Estimates and Assumptions

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgements and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of financial statements and the amount of revenue and expenses during the reported period. Application of accounting policies involving complex and subjective judgements and the use of assumptions in these financial statements have been disclosed. Accounting estimates could change from period to period. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimate are recognised in the period in which the estimates are revised and, if material, their effects are disclosed in the notes to the financial statements.

1. Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

1.1 Formulation of Accounting Policies

Accounting policies are formulated in a manner that result in financial statements containing relevant and reliable information about the transactions, other events and conditions to which they apply. Those policies need not be applied when the effect of applying them is immaterial.

In the absence of an Ind AS that specifically applies to a transaction, other event or condition, management has used its judgement in developing and applying an accounting policy that results in information that is:

- (a) relevant to the economic decision-making needs of users and
- (b) reliable in that financial statements:
 - i. represent faithfully the financial position, financial performance and cash flows of the entity;
 - ii. reflect the economic substance of transactions, other events and conditions, and not merely the legal form;
 - iii. are neutral, i.e. free from bias;
 - iv. are prudent; and
 - v. are complete in all material respects on a consistent basis.

In making the judgement management refers to, and considers the applicability of, the following sources in descending order:

- (a) the requirements in Ind ASs dealing with similar and related issues; and
- (b) the definitions, recognition criteria and measurement concepts for assets, liabilities, income and expenses in the Framework.

In making the judgement, management considers the most recent pronouncements of International Accounting Standards Board and in absence thereof those of the other standard-setting bodies that use a similar conceptual framework to develop accounting standards, other accounting literature and accepted industry practices, to the extent that these do not conflict with the sources in above paragraph.

1.2 Materiality

Ind AS applies to items which are material. Management uses judgment in deciding whether individual items or groups of item are material in the financial statements. Materiality is judged by reference to the size and nature of the item. The deciding factor is whether omission or misstatement could individually or collectively influence the economic decisions that users make on the basis of the financial statements. Management also uses judgement of materiality for determining the compliance requirement of the Ind AS. In particular circumstances either the nature or the amount of an item or aggregate of items could be the determining factor. Further an entity may also be required to present separately immaterial items when required by law.

1.3 Operating lease

Company has entered into lease agreements. The Company has determined, based on an evaluation of the terms and conditions of the arrangements, such as the lease term not constituting a major part of the economic life of the commercial property and the fair value of the asset, that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

2. Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

a. Impairment of non-financial assets

There is an indication of impairment if, the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. Company considers individual PPE as separate cash generating units for the purpose of test of impairment. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

b. Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

c. Defined benefit plans

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates.

Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation.

d. Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Recent Accounting Pronouncements:

On 31st March 2023, Ministry of Company Affairs has amended the Companies (Indian Accounting Standards) Amendment Rule, 2023, applicable from 1st April 2023, as below:

Ind AS 103 – Business Combination:

The amendment required the new disclosure in respect of date on which the transferee obtains the control of the transferor. The company does not expect the amendments to have any impact in its financials.

Ind AS 107- Financial Instruments Disclosure:

The Companies (Indian Accounting Standards) Amendment Rule 2023 has amended paragraph 21 and paragraph B5 of Ind AS 107, thereby requiring companies to disclose their Material Accounting Policy Disclosure rather than their significant accounting policy. The company does not expect the amendments to have any impact in its financials.

Ind AS 1 – Presentation of Financial Statements:

The amendment states that:

- Companies should disclose the material accounting policies rather than the significant accounting policies.
- Clarifies that accounting policies relate to immaterial transactions, other events or conditions themselves are immaterial and therefore need not to be disclosed. The company does not expect the amendments to have any impact in its financials.

Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors:

The amendment rule 2023 inserted the definition of accounting estimate and omitted the change in accounting estimate. But the company does not expect the amendments to have any impact in its financials.

Ind AS 12 – Income Taxes:

Amendment RULE 2023 have issued certain amendments to Ind AS 12. The amendments have been made to narrow the scope of initial recognition exemption, i.e., it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary difference. With effect from 1st April 2023, the initial recognition exemption will be read as under:

- At the time of transaction, affect neither accounting profit nor taxable profit (tax loss).
- At the time of transaction, does not give rise to equal taxable and deductible temporary difference. The company does not expect the amendments to have any impact in its financials.

JEL had to close its establishment in Kota (“**Establishment**”) following accumulated losses over the years and was declared as a Sick Unit on April 2, 1998, under the Board for Industrial and Financial Reconstruction. Arafat Petrochemicals Private Limited (“**APPL**”), pursuant to the AAIFR/BIFR Scheme, took over the assets of the establishment in order to revive and resume the manufacturing activities of JEL with restoration of employment to achieve rehabilitation of the Sick Company. The Respondent alleged that JEL failed to pay simple interest at the rate of twelve percent per annum from the date on which the contributions became due till date of its actual payment. It was also claimed that JEL failed to pay within the prescribed time limit as required by the law for the alleged period. JEL argued that as per the settlements, APPL is liable pay the consequential amount. Furthermore, according to JEL, the actual dues were contributions which was to be paid for the relevant period was already paid by JEL for Rs. 2,49,83,978 on November 25, 2005. However, on February 28, 2022, the Respondents passed the orders, whereby the damages have been levied to the tune of Rs. 23,97,047 and interest of Rs. 3,85,250 aggregating to Rs. 27,82,297 on JEL for the alleged period. Hence, JEL has filed this appeal and prayed to the Tribunal to stay the operation of the Orders of the Respondent till the final disposal of the appeal and to issue direction to the Respondent to not take any coercive action against JEL for recovery of the amounts. The matter is currently pending and the next date of hearing is October 10, 2024.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The FDI Policy prescribes the limits and conditions subject to which foreign investment can be made in different sectors of the Indian economy and FEMA regulates the precise manner in which such investment may be made.

The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. Pursuant to the press release dated May 24, 2017, the Union Cabinet phased out the FIPB and it was replaced by the Foreign Investment Facilitation Portal (**FIFP**) to speed up the FDI inflow and to increase the transparency in the FDI approvals in the country. The DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the "**SOP**"). The SOP provides a list of the competent authorities to grant approvals for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under the automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned Administrative Ministry/Department shall act as the competent authority (the "**Competent Authority**") for the grant of post facto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP will identify the Competent Authority.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("**FDI**") through press notes and press releases. The DIPP, has issued a consolidated FDI Policy DPIIT File Number 5(2)/2020-FDI Policy Dated the October 15, 2020 ("**FDI Policy 2020**"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI policy issued by the DIPP that were in force till that date. The Government of India proposes to update the consolidated circular on FDI policy once every year and therefore, the FDI Policy 2020 will be valid until the DIPP issues an updated circular.

Under the FDI Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to 100% without any prior approvals, however the foreign investor must follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("**FDI**") and approval from the Government of India will now be handled by the FIFP.

The transfer of shares between an Indian resident and a non-resident does not need prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA, and the transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non- resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the extant policy of the Government of India, erstwhile OCBs cannot participate in this Issue. OCBs or Overseas Corporate Bodies have been de-recognised as a class of investor entity in India with effect from September 16, 2003.

Overseas Corporate Body means a company, partnership firm, society and other corporate body owned directly or indirectly to the extent of at least sixty per cent by Non- Resident Indians and includes overseas trust in which not less than sixty percent beneficial interest is held by Non-resident Indians directly or

indirectly but irrevocably, which was in existence as on September 16, 2003 and was eligible to undertake transactions pursuant to the general permission granted under FEMA. Any investment made in India by such entities will be treated as investments by incorporated non-resident entities, i.e. a foreign company.

The Issue, if renounced by our shareholders, may include offers within India, to Indian institutional, non-institutional and retail investors in offshore transactions as defined in, and made in reliance upon exemptions from the registration requirements under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**"), including the exemption under Regulation S ("**Regulation S**") of the U.S. Securities Act.
